

Exciting news! *ResearcherID* and *Publons*, both part of the Web of Science Group, are coming together so you can get all the benefits of *Web of Science*, *ResearcherID*, and *Publons* in one place.

From 15 April [Publons](#) will be the new environment where you can add your publications, track citations, and manage your publication records across *Web of Science*. Your current *ResearcherID* account will be inaccessible from 12 - 14 April while it is moved to *Publons*.

With your *Web of Science ResearcherID* hosted on *Publons* you will also be able to track your peer review history and journal editing work right alongside your publications and citations — showing a more complete record of your research impact.

For now, no action required! Just go with the flow. We'll let you know when your *ResearcherID* is available on *Publons*, where you'll find all your claimed publication history has been transferred over, and you can start making the most of all the additional features:

- **All your publications**, easily imported from *Web of Science*, ORCID, or your bibliographic reference manager (e.g. *EndNote*, *Zotero* or *Mendeley*)
- **Trusted citation metrics**, automatically updated based on the editorially curated *Web of Science Core Collection*, which includes more than 21,000 of the world's best journals
- **Your verified peer review and journal editing history**, powered by partnerships with thousands of scholarly journals showing your additional contributions
- **Downloadable academic record** summarizing your scholarly impact as an author, editor and peer reviewer, which you can use for promotion and career discussions

Don't worry if you already have a *Publons* profile; we will combine your *ResearcherID* and *Publons* accounts and ensure no data is lost.

Don't want your ResearcherID moved to Publons?

We're only moving public *ResearcherIDs*. Change your *ResearcherID* privacy settings to "private" before 11 April and it won't be moved to *Publons*.

Note: If you set your *ResearcherID* to "private", it will no longer be accessible from 12 April 2019. Your saved publication lists will still be accessible in *EndNote* and you can create a new *ResearcherID* on *Publons* at any point in the future by registering a new profile and claiming at least one *Web of Science* publication.
